

## Try It - Simply Pressed Clay

Technique using Simply Pressed Clay and Molds from Stampin' Up!

1. Use the alphabet mold to create letters. After filling the mold, rub away as much excess clay as possible. Place the mold in the freezer for about 20-30 minutes. Remove the mold from the freezer, and pop out the pressed clay onto a plate being careful not to handle too much. Allow to dry overnight. Trim extra clay from edges. To color the clay, add ink to the clay before placing in the mold or color the pressed item with a marker once dry. Use the letters to add a greeting to your project.

2. Press the clay into the button or flower mold. After the pressed clay has been removed and dried, add it as a lightweight embellishment to your project (the aqua button).

- Roll out clay into a thin flat layer, and use a framelit to "cut" out the clay by tearing it away from the die's edge. Color stamp with markers, and stamp into clay shape. Remove stamp, and allow to dry. Add to project.

- Roll out clay into a thin flat layer, and trim a small rectangular piece with a plastic knife. Ink a word stamp, and stamp into clay gently. Poke a hole into one end, and add thread after the clay has dried. Add to your project.

5. Add ink from reinker to a small amount of clay, and work until the color is even. Roll out clay into a thin flat layer, and use a framelit to “cut” out the clay by tearing it away from the die’s edge. Allow to dry. Ink and stamp a small pattern onto dry clay embellishment.

6. Roll out clay into a thin flat layer, and use a framelit to “cut” out the clay by tearing it away from the die’s edge. Stamp uninked stamp into clay, and afterward allow to dry. Color in stamped depression with a marker.
